

Association Management Inc.-Kingwood is collecting Christmas trees around the community until Jan. 9 which will be donated to the annual Dunes Day Project.

The Dunes Day Project was started to help rebuild the sand dunes along Brazoria County beaches and AMI-Kingwood wanted to help in any way they could.

"Collecting Christmas trees for the Dunes Day Project is something that was started at AMI's Pearland office and we wanted to offer green and eco-friendly ways to dispose of Christmas trees," Belinda Robinson of AMI-Kingwood said.

The sand dunes out in Brazoria County were damaged by Hurricane Ike but because of last year's Dunes Day Project, the dunes are coming back, which protects property from the sudden surge and battering waves they might experience during a large storm.
